A hand-drawn technical sketch of a stepped foundation. The foundation consists of three horizontal steps. The top step has a vertical height of 1.50 and a horizontal width of 1.35. The middle step has a vertical height of 1.60 and a horizontal width of 1.35. The bottom step has a vertical height of 1.60 and a horizontal width of 1.35. A vertical dimension line on the left indicates a total height of 5.00 meters from the base to the top of the foundation. A horizontal dimension line at the bottom indicates a total width of 1.00 meters. A circle with a radius line is drawn at the corner where the top step meets the middle step, representing an eccentricity of 1.50 meters. The eccentricity is also explicitly labeled with a dimension line.
