Diagram of vertical pipe 1. The pipe is represented by a rectangle. To its left are depth measurements in parentheses: (1.80), (1.50), (1.17), (0.82), (0.51), and (0.0). Inside the pipe, there are handwritten values: 0.4, 0.3, 0.2, 0.1, and 50. To the right of the pipe, there are more depth measurements in parentheses: (1.66), (1.04), and (0.34). At the bottom of the pipe, there is a downward arrow pointing to a horizontal line labeled 256.69.

b) Horizontalinis:

PRIRIŠIMO BRĖŽINYS:

Horizontal connection diagram. It shows a horizontal pipe connected to a vertical wall. The pipe has a diameter of 16 mm, indicated by the handwritten text "16 mm". The wall is represented by a thick vertical line. There are small circles at the ends of the pipe, possibly representing valves or connections.

A vertical scale bar with markings. It consists of a vertical line with several short horizontal tick marks. Below the line, there are three parallel diagonal lines, likely indicating a specific unit or measurement.
